

## QUALITY POLICY

GB Inspection Systems is committed to delivering high-quality products and services in the design, manufacture and sale of ultrasonic transducers and the provision of associated services, including calibration.

We are dedicated to achieving sustained customer satisfaction by consistently meeting or exceeding customer expectations and applicable statutory, regulatory and other relevant requirements.

To achieve this, we will:

- Maintain and continually improve the effectiveness of our Quality Management System
- Establish and review measurable quality objectives that support our strategic direction
- Ensure our personnel are competent through appropriate training, experience and ongoing development
- Promote innovation and responsiveness to customer and market requirements
- Provide independent and impartial calibration services that meet defined customer and regulatory requirements
- Apply risk-based thinking to enhance product and service reliability and customer confidence

This Quality Policy provides the framework for establishing and reviewing quality objectives and is integral to our business strategy and management review process.

In addition, GB Inspection Systems is committed to providing safe and healthy working conditions for the prevention of work-related injury and ill health. We will eliminate hazards and reduce occupational health and safety risks, comply with applicable legal and other requirements, and ensure consultation and participation of workers to continually improve the Occupational Health and Safety Management System.

Senior Management accepts overall responsibility for the implementation, maintenance and continual improvement of the Quality and Occupational Health & Safety Management Systems.

The policy is communicated to all employees, understood within the organisation, and is available to relevant interested parties upon request.
